Project Name

NT CleanTrack

CONCEPT A web-based system that helps a residential and commercial cleaning & maintenance business manage client bookings, staff scheduling, and service reporting in one place.	OBJECTIVES & PURPOSES - Centralise job bookings and scheduling - Reduce double-bookings and missed jobs - Automate client service reports - Give managers clear job status visibility	VALUES - Reliability - Transparency - Time-saving			
PERSONAS - Office administrator - Cleaning / maintenance staff - Business manager - Clients (residential & commercial)	PROBLEMS TO SOLVE - Bookings managed via calls, texts and spreadsheets - No single view of staff availability - Client reports compiled manually and slowly - Job history hard to track or search	COMPONENTS - User accounts & role-based login - Booking & scheduling engine - Job / task records - Reporting & export module - Notifications - Admin dashboard			
FEATURES - Create, edit, reassign and cancel bookings - Auto-check staff availability before assigning a job - Track job status: Scheduled, In Progress, Completed, Cancelled - Store client, site, service type, date/time and notes per job - Generate and export service reports (PDF) per client or period - Search and filter jobs by client, staff, date or status - Dashboard summary of today's and upcoming jobs		MILESTONES 1. Requirements & planning 2. Database design (SQL Server/EF) 3. Backend - Web API 4. Frontend - MVC / jQuery client 5. Reporting module 6. Testing 7. Final release & demo			
STAKEHOLDERS - Project owner: Yuan Li - Business owner / manager (client) - Office admin staff (primary users) - Field cleaning / maintenance staff - Developer & Tester roles (team) - Lecturer / supervisor	RISKS - Limited development time in the semester - Data accuracy in scheduling and reporting - Scope may grow beyond one semester - Integration between booking & reporting modules - Usability for non-technical staff	DELIVERABLES - Working web application prototype - Source code (GitHub repository) - Database design / ER diagram - Business & technical documentation - Final presentation			
APP / WEBSITE NAME NT CleanTrack	CONTEXT OF USAGE & COVERAGE Desktop/laptop for office staff; tablet/mobile for field staff on-site. Requires internet access.	TECHNOLOGY HTML, CSS, JavaScript/jQuery, ASP.NET Core MVC, Web API, SQL Server, Entity Framework, Git/GitHub	PLATFORM, OS Web platform; Chrome, Edge, Safari on Windows and macOS	ORIENTATION Desktop landscape layout, responsive for smaller screens	RELEASE Academic demo / presentation (not public release)
